The Australian Paralympic Committee (APC) and Triathlon Australia (TA) extends an invitation to all sport science and sports medicine staff, (physiotherapists and physicians), coaches, sports development staff and technical officials to attend an Introduction to Paratriathlon workshop.

The Seminar will be held in Sydney in conjunction with the April 2012 ITU World Triathlon Series.

The seminar will involve a 3 hour session, focusing on:

- History and structure of Paratriathlon
- Paratriathlon classification
- Provisional classification
- Update of classification system review
- Classifier development pathway
- Specific rules relating to Paratriathlon

Presenter: Marguerite Christophers
ITU Head of Paratriathlon Classification.

This is an opportunity for medical and technical personnel to become familiar with the basis of classification related to Paratriathlon and potentially initiate the pathway to become a Paratriathlon classifier under the new classification system.

RSVP by **Friday 17th February 2012** to info@triathlon.org.au
